# porcelain made in germany. we are the manufacturer.

Weiden production – founded in 1881; this is now the largest and **most modern** porcelain manufacturing plant in Europe

Schönwald production – founded in 1879; recently, the Schönwald plant inaugurated two furnaces with the latest firing technology offering extremely high flexibility in the expansion of capacities in line with demand

Selb – decoration and logistics center

**“Made in Germany”** allows better control of pricing and future availability

## unsurpassed quality without compromise.

Bauscher is a global brand for professional, international dining culture, with porcelain for the entire restaurant and catering segment as well as hotels, professional catering, and the hospital and care sector. Bauscher porcelain offers all the excellent properties of true hard porcelain.

Bauscher’s porcelain is fired at over 2550°F, resulting in a hard glaze that:

- makes our porcelain **extremely resistant to metal marking, caustic solutions, and shocks**
- enables it to retain its luster while being **hygienically safe**
- protects decorations and color, which sink into the glaze and fuse with the porcelain, making them **permanently protected**

Even after the thousands of wash cycles, our porcelain will look as new as it did on the first day. We have the skill required to design porcelain that satisfies the demands of perfect catering tableware and completely fulfill the needs of our customers: **design, functionality, durability, stackability** and **breakage resistance**. Opting for our porcelain means putting our experience and quality to work for you.

## noble china bone white

Noble China represents a new class in porcelain. The difference lies in the play between the subtle exclusive **Bonewhite color** and the extraordinarily intricate porcelain of the innovative new material Noble China. This revolutionary new development from Bauscher lends a remarkable delicacy to the collections. Our porcelain experts have succeeded in uniting a **graceful appearance** with a new standard of chip resistance.

The high firing temperature of 2550 °F gives Noble China its **extreme glaze hardness** and **durability**. At once delicate but robust, this collection is ideal for daily use in hotels and restaurants. With an extensive range of articles to meet all needs, it guarantees a winning presence on the international stage.

## european white

Our products use only the world's **second hardest material after diamonds**. Its ability to withstand the rigors of catering makes it perfect for professional applications. To this end, we work exclusively with premium raw materials - kaolin, quartz, and feldspar in a very special mix - at factories that are equally first rate. Our manufacturing sites are some of **the world's most modern plants**, where premium grade porcelain is indeed **"Made in Germany."**

Our porcelain's hard glaze makes it extremely **resistant to metal marking, cuts, and abrasions**. The high quality materials, extremely high firing temperatures, and optimum design ensure a high chipping resistant china. The unsurpassed quality and incomparable look and feel of this porcelain makes it the sophisticated solution that our discriminating customers seek. Porcelain with a flair for being combined.

purity promises a **dignified presence**  
across a range of elegant interior designs

## master glassmakers. since the 14th century.

Ongoing research and innovation, cutting-edge materials, creative flair, stylish and absolutely elegant design are the features that distinguish a broad selection of **high-end tableware articles**.

Luigi Bormioli is an acknowledged glassware stylist, an expression of **"Made in Italy"** excellence worldwide that has always produced in accordance with the **highest standards of quality** and refined design content.

### son.hyx

Developed and registered by Bormioli Luigi. A high-tech blown lead-free crystal glass that does not contain any heavy metals. The result is a glass with an extremely high level of transparency and brilliance, has a beautiful sound, maintains its clarity after thousands of industrial dishwashing cycles, and possesses a level of durability and strength that you can enjoy for many years to come. Ultra clear, totally transparent and sparkling according to ISO/PAS iwa 8:2009.

### sparkx

Luigi Bormioli Research Team by means of spectrophotometric measures has obtained this new glass outstandingly transparent and sparkling. This new material has an extremely low iron content so that it does not interfere with both the transparency and the colorimetric purity of glass. Furthermore, **sparkx** is lead and other heavy metal free. is classified Ultra Clear according to ISO/PAS IWA 8:2009.

the shapes and dimensions of the stemware are designed to:

- lessen the perception of the alcoholic elements, enhancing only the true aromas of the specific vine varieties
- balance the gustatory perceptions and aromatic elements; excellent mouthfeel
- make the aromatic perception intense and balanced
- allow the wine to have a slow and intense aeration without modifying the typical aromas

designed in collaboration with the esteemed centro studi assaggiatori to enhance the organoleptic qualities of different varieties

TITANIUM Reinforced

chimney balances the wine aromas with a low alcoholic content and its cylindrical shape directs the wine to the center of the tongue

conical shape condenses the alcoholic vapours so that in the aromatic chamber only the wine aromas will develop

smooth connection between the conical and convex shape avoids the breakage of the aromatic molecules during the wine swirling process

convex surface enables a high wine oxidation on the surface (A) with a low oxidation underneath (B), retaining the most delicate aromas and facilitating their pleasant development

epicure (indentation) at the base of the bowl, shows the real wine color reflection

permanent ultra break-resistant stem (titanium reinforced)

(A)

(B)
